

We Looked at 101 Speech Pathologists serving St. Louis and Picked the Top 15

Why These Speech Pathologists?

Our goal is to connect people with the best local experts. We scored speech pathologists on more than 25 variables across five categories, and analysed the results to give you a hand-picked list of the best speech pathologists in St. Louis, MO.

Speech Language Learning Systems

Speech Language Learning Systems has been using speech-language therapy and related techniques to help children, toddlers, and adolescents struggling with speech and language related difficulties for over 19 years. These difficulties often show through reading, speaking, listening, writing, and oral expression challenges. Other symptoms may be articulation disorders and social communication problems. The Chesterfield company assists older children with executive function coaching which equips learners with organizational skills necessary for success in school. The founder of the practice is a graduate of Truman University where she obtained her degree in communication disorders. She has been practicing since she got her license in 1988.

 Chesterfield, MO, 63017  (636) 537-1576
